*Uncolored fac-similes, showing size and style.*

"These brilliant colored Flags faithfully represent the emblems of the different nations of the earth, and as such are a great acquisition to any Album, while the exceedingly low price (25 cents) at which they are published places them within the reach of all."

"This Chart containing many Flags never before published, has been collected with great care, and can be relied upon as being strictly accurate, and by its aid the nationality of any ship may be easily determined, as it gives the Flag of the NATION instead of the gorgeous piece of bunting which simply belongs to one family, and is seldom, if ever, seen out of their country."

"These sheets possess three great advantages (to the Collector) over any other we are acquainted with, which consist in the facts that there is only one Flag to each country: more nations represented than have heretofore been given, and only Flags of those countries which issue postage stamps. These we consider of great importance to those who buy them to put in albums, as they can use them all instead of having to throw away half the purchase. The colors are very brilliant, and withal correct, and being printed on very thin paper, the book is not swelled to an inordinate thickness."

\* Beautifully and correctly printed in FIVE colors on thin paper for albums. Price only 25 cents.

PROSPECTUS.  
THE  
COIN COLLECTORS' JOURNAL.

"Types of active and extinct civilization."  
"More historic than written history."

## TO THE NUMISMATIC FRATERNITY.

THE COIN COLLECTORS' JOURNAL, now about to enter upon the thirteenth year of its existence, feels that it is possessed, in view of its long and very successful career, of an unquestionable right to say a good word in its own behalf.

## THE BEST AND CHEAPEST.

THE COIN COLLECTOR'S JOURNAL is undoubtedly the best, as it is also the cheapest, publication of its class issued in the UNITED STATES, or indeed, the world. It is not an amateur sheet, inflicting on its readers old, moss-grown articles on 1799 cents and 1804 dollars, but a regularly established periodical, issued promptly on the first day of each month. In form the full octavo; in size and dress sixteen pages, printed on heavy, tinted paper, in clear, bold type, each number liberally illustrated with well executed wood cuts from the coins themselves it forms in its completeness a volume of nearly 200 pages, depicting and describing many hundreds of coins.

## THE FIRST NUMISMATIC WRITERS

are contributors to our columns, and will continue to treat intelligently of their several specialties during the coming year. As a guarantee for the future, witness some of the work of the past three years, which embraces:

R. COULTON DAVIS, PH. G., on U. S. Pattern and Experimental Issues. A most exhaustive treatise on this obscure branch of numismatic science, from the pen of the only collector capable of handling the subject at all.

ROBERT MORRIS, LL. D., on the Numi-Cistophori Ancient Dates on Coins, and other subjects.

Mr. HECTOR E. KIRKWOOD, the eminent numismatist and traveller, on the Coins of Northern Africa, Newfoundland and the German Crowns, etc., etc.

In addition have been treated the coins of many nations, viewed generally and in detail, including many complete descriptive lists never before published in the English language, the possession of which is absolutely essential to every intelligent collector who desires to keep abreast with the times.

## A FEW OF OUR SPECIAL SUBJECTS.

The following are a few of the titles of our special subjects of coins:

That there will be found in the pages of each monthly issue, exhaustive reviews of all current numismatic topics, descriptions of new issues, reviews of numismatic books, notes on prominent American and foreign sales, reports of the transactions of the American Numismatic and Archaeological Society, and a host of general information upon coins.

Inquiries upon numismatic subjects are promptly and intelligently answered in our Correspondents' Column; and we would say in this connection that we cheerfully accept suggestions from subscribers as to the class of articles likely to prove interesting, as it is our earnest desire to please and satisfy all.

The back volumes of the Journal we are able to supply a limited number postpaid at the following rates.

We shall also hold its columns open for a free discussion of all questions which may arise in the Philatelic world, and we feel confident that our journal will recover the place which it held among American Philatelic Literature, before its discontinuance in 1878.

## CONFEDERATE NOTES.

Of all classes of Paper Money which can be procured at moderate expense, these are the most interesting, both from the multiplicity of designs, and from their being the principal relics of the greatest of civil wars. The beautifully engraved notes issued at Montgomery, at the beginning of the war, (May, 1861,) with the imprint of the National Bank Note Co. of New York, are especially prized.

We have also a large variety of Bonds, State bills and Fractional currency, selections of which we will send on approval to parties who furnish satisfactory references.

In ordering it will be sufficient to give the Number of the note and price.

### Colonial & Continental Currency.

These repudiated notes are of great interest, both for their antique and picturesque designs and quaint mottoes, and for the autographs of our early settlers.

Our Paper Money catalogue gives a complete price list of all known varieties, with illustrations of notes from each of the different states.

### Confederate Bills.

We have a great many of these notes which became worthless as money at the end of the war, but are now eagerly sought for by Antiquarians. They are also fully described with prices in our Paper Money catalogue. We prefer to buy these, also Confederate bonds, either in collections or in quantity, small lots we cannot use.

### Fractional Currency.

Most coin collectors keep a set of our Fractional Currency, which is rapidly increasing in value. For prices see Paper money catalogue.

TO THOSE WHO HANDLE MONEY, OR COLLECT COINS  
AND MEDALS AS A MATTER OF RECREATION,  
STUDY, OR PROFIT, THE FOLLOWING MAY  
BE FOUND INTERESTING.

**Numismatics.**—There are, upon a low estimate, ten thousand active collectors of Coins and Medals in the United States and Canada, whose cabinets represent, in intrinsic value, amounts from a few hundred dollars to many thousands. There are numerous collections which are valued above \$5,000 while some reach as high as \$25,000 and even \$50,000.

Our principal cities have Societies devoted exclusively to the science of numismatics, embracing hundreds of members, while many others upon history, antiquity, and kindred subjects, devote time and space to coins.

**Collecting as an amusement.**—In foreign countries the forming of cabinets of coins has been a means of pleasant recreation and study for upwards of four hundred years. This pursuit has not been confined to any class, rank or position. The field for collectors is large and varied, extending from the period when the first metal took the shape and name of a coin seven hundred and fifty years before Christ, in an almost unbroken line, down to the present time. Without the existence of these numismatic treasures, history would have many blank pages to-day. It cannot be said that coins are without interest, or that they possess less fascination, than other objects of curious research, whether antique, mediaeval or modern. They lead to such a knowledge of history and art, as cannot otherwise be obtained. There is no truer saying than that "we all have our hobbies." Hence we speak a word for Numismatics, commanding the same to your careful consideration, asserting that it will be found entertaining and instructive to a degree that challenges all other sciences or pursuits.

**How we promote it.**—We desire to announce to collectors and the public in general that we give our whole and undivided attention to the buying and selling of stamps, coins and medals, and of books treating on the subject. This is our only and exclusive business. We are not "spare time" dealers. Our stock at all times is large, embracing all classes of coins in the various periods, and our facilities for obtaining the same, at home and abroad, are unsurpassed. We have correspondents in the principal cities and coin centres of Europe and Asia, who, like ourselves, make a business of accumulating whatever is rare and interesting in the way of Coins and Medals relating to their special localities.

**Catalogues.**—Our Standard Catalogues, giving prices we ask for coins in several degrees of preservation, are widely and favorably known. They give in minute detail descriptions of various issues, embody many facts of historical interest, and are essential to the collector, who will find that they lessen his labors and enhance his pleasure.

**Our Circulars.** which are distributed free upon application, are applied for and sent to hundreds of collectors weekly. They are prepared with the view of making them instructive, attractive and serviceable, and they include a condensed price list of coins and medals covering all periods.

**Coins on Approval.**—While Price Lists and Descriptive Catalogues offer advantages to the collector in making purchases, we find that sending coins on approval gives the greatest amount of satisfaction. We are constantly supplying to our customers carefully prepared invoices of the special lines in which they are interested. By this method we have secured the patronage of numismatists from all parts of the world. We pay express charges one way, except when selections amount to less than \$5.00. Parties unknown to us must send references or a deposit.

**How to Send Orders.**—In sending orders, specify as nearly as possible the particular class of coins or medals desired, stating the country and period to be represented. It is well to *enumerate* in your order a *number of pieces* that will in value exceed the amount of your remittance. It is impossible to keep a full line of everything, no dealer in the world can do this. Stock is constantly changing through the daily transactions in our business. Prices quoted in our catalogues do not include postage, and we register letters and packages only when supplied with an additional ten cents.

**Use Express Companies.**—The mails are regarded as unsafe for the transmitting of valuable packages. No claim for remuneration in case of loss is considered by the U. S. Government. Express Companies assume responsibility, hence we always urge the *sending of important parcels by Express*.

**No Counterfeits.**—We find the interests of the Science are best promoted and perpetuated by dealing *only in genuine coins*. We deprecate the manufacture, purchase, sale, or possession of electrotypes, copies, altered dates, or any false or fictitious piece whatsoever. Customers may rely upon receiving from us genuine coins, and in offering the same we always consider our reputation at stake.

**What Gives a Coin Value.**—The age of a coin is not conclusive to establish rarity; it is the historic interest it may possess, or the limited number struck, which will make it sought after by a large number of collectors. A coin of Augustus, the first Roman Emperor, B. C. 27 to A. D. 14, is obtainable in fair condition for 50 cents, while the 20 cent pieces from the U. S. Mint of 1877 and 1878 command from ten to fifteen times their face value. To go back a little further, a United States cent of almost any date between 1793 and 1814, in perfect state of preservation, is worth \$5.00, while some of the dates within this period are worth very much more—\$25.00 is not an uncommon price for the cents of 1793, 1799 and 1804.

CONDITION, or more plainly, the state of preservation, always regulates the price of a coin; it has the greatest bearing however on the rare issues which multiply rapidly in value as they approach perfection; this means *mint* state and positively unworn. If scratched, corroded, spotted, or stained, however slightly, its value is impaired.

**Auction sales.**—In this specialty we are prepared to assume every responsibility connected with the custody, cataloguing, and public sale of coins and medals. We are able to secure the patronage and competition of the buying collectors the world over. Our accurate attributions, clear descriptions, and impartial rating of condition, has brought the greatest satisfaction, to owner, cataloguer, and purchaser. By this means, we have obtained the highest prices for collections placed in our hands, and gained the confidence of bidders.

**We purchase.**—We are always prepared to buy rare, fine, or desirable pieces, but do not send them to us without first advising what you have, supply us with lists or rubbings; they may not be of sufficient value to repay cost of express; If they appear to have more than ordinary value, we will then inform you; but we never invest or make offers without seeing the pieces,—it is impracticable; hence, what you have to sell must be submitted for our inspection. Our "Premium List" contains all of the United States coins which are worth more than their face value.

**Central for business.**—Our Location is central, situated on one of the most noted and celebrated thoroughfares in the world, where those interested in the science are always welcome. Our extensive library and stock of Numismatic works is free for reference, while the inspection of our stock of coins and medals, separately enveloped and fully described with prices marked in plain figures, may be pursued *ad libitum*.

We cheerfully answer all questions relative to the subject of Numismatics whenever postage is supplied.

# INDIAN RELICS.

OF THE PRIMITIVE INHABITANTS OF THIS VAST CONTINENT comparatively little is known, and the few relics of the various tribes are rapidly passing away. The grand mounds of the Ohio and Mississippi Valleys are being opened, one by one, and robbed of their treasures, so that in a few years the interesting remains now offered so cheaply will be quite unattainable.

About the only remains of the pre-historic inhabitants which remain to us consist of stone implements, such as axes, mortars, corn grinders, skinners, knives, ornaments, spear heads, arrow points, &c., all chipped out of solid rock, and many exhibiting remarkable skill in the treatment of the stone for the various uses to which it has been put. It is supposed that many of these articles were made several thousand years ago. Some of these are now rare, and when of extra workmanship command high prices. We always carry a large stock of those implements most frequently found and frequently have rare and valuable relics.

AMERICAN COIN SCALE.

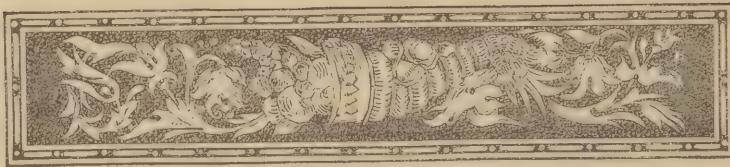

MILLIMETER SCALE.

The American scale of measurement is commonly in use. We, however, give the millimeter scale also, which, it will be seen, is far more accurate, as it represents 25 parts to the inch, while the American is limited to 16; thus furnishing a more accurate measurement.

### PLEASE READ

THIS: the *Fifteenth* edition of our COPPER COIN CATALOGUE, has been prepared with special care, and is, in every respect, more extensive than any edition previously issued. Collectors will notice many changes in value, and generally in their favor.

The arrangement is geographical, but a full index will serve as ready reference.

The absence of price indicates that the piece is rare, and seldom in stock. There are, however, some series issued within the past few years that have scarcely appeared here, and just at present we are unable to supply them. These are also unpriced, but it is possible that some of them may soon be in stock.

Base or billon pieces are composed of a mixture of copper and silver.

In the English series the Penny and its parts are represented in this Catalogue as follows:  $\frac{1}{16}$ d.— $\frac{1}{4}$  Farthing;  $\frac{1}{12}$ d.— $\frac{1}{3}$  Farthing;  $\frac{1}{8}$ d.— $\frac{1}{2}$  Farthing;  $\frac{1}{4}$ d.—Farthing;  $\frac{1}{2}$ d.—Halfpenny; 1d.—Penny.

A long dash (—) shows where the legend divides, when one part reads upward and the other downward. An upright dash (|) shows the legend is in lines and so divided.

Date enclosed thus: ( ), signifies the period or date of issue, when not on the piece.

Klippe—square pieces.

We do not claim to enumerate here every copper coin known, but those most likely to be met with and obtainable at a reasonable sum. We frequently, however, have pieces not mentioned in these pages, and should be pleased to have our patrons name such as they may desire.

We frequently have intermediate grades of U. S. Cents, as, for instance, we may quote fair 50c., good \$1.00, and yet have one we may price at 75c.

Our experience is that collectors when ordering frequently select the lowest priced coins. This is especially the case with the beginner. It must not, however, be considered as the best bargain by reason of being the cheapest or lowest grade. It affords in most instances what may be termed ordinary specimens, which, to the collector who remains in the field, soon becomes unsatisfactory.

The best returns are from the choicest specimens; a coin in absolute perfection is the pride of the advanced numismatist.

It is well to enumerate in your order a number of coins that will in value exceed the amount of your remittance. It is impossible to keep a full line of every series. No dealer in the world can do this. Stock is constantly changing through the daily transactions of our business.

**DATES.**—In filling orders for Foreign Coins, when more than one date is given, as Hayti, 1829-46, we do not agree to supply any particular date. Where a special year is required the price will sometimes be higher, as we price the cheapest variety.

**POSTAGE.** The prices given do not include postage, which should be added at the rate of one cent per ounce, and ten cents for registration. The latter is optional, but if not registered, they are sent at purchaser's risk. It is much better to make orders amount to \$1 and upwards, and order them sent registered, than to send small orders at the risk of ordinary mail.

**Orders for less than twenty-five cents are respectfully declined.**

Remittances should be made by draft on New York, or P. O. Money Order, payable to THE SCOTT STAMP & COIN CO., L'D, or in registered letter.

Orders should be written out plainly with the price of each piece wanted, and the full address in each letter. Unless otherwise ordered, we send by mail or express, whichever is cheapest.

We are always prepared to buy coins, and especially fine U. S. and American Colonial Coins. For particulars see our Premium List, 9th edition, just issued.

For other information relative to our manner of doing business, see 32 page circular.

*All Coins sold by us are warranted genuine.*

## WAR TOKENS AND STORE CARDS.

## 1863 WAR TOKENS.

There are about 4,500 varieties of this issue; we have a large number of them in stock, which we offer as follows: All different, 15 for 25c., 25 for 50c., 50 for \$1.00. For a full and illustrated account of these tokens see Coin Collector's Journal, vols. 7 and 8.

## STORE CARDS or Tradesmen's Tokens.

At various times between 1789 and 1860 these private issues were uttered, but the great multitude of them made their appearance about 1823, and between the years of 1834 and 1850. They are found in copper, brass, and white metal, and usually the size of the old cent. We have large lines of them from 5c. upwards; there are, however, many that are very rare, commanding from \$5 to 10 and upwards.

## BRAZIL.

The copper coins of Brazil are mainly of one type up to 1832, but a great difference in size is noticeable in issues of the same denomination and year, from the various mints: this is especially the case between the years 1824-32. It seems to be a reasonable conclusion that each province had its own coinage and

if their money was accepted in other parts of Brazil its rate was changed; hence we have catalogued under separate mints. Value reduced by counterstamping, is common, after John VI. We note the original issues only.

## PAPAL STATES.

Under this head we arrange the coins struck by the Popes for Rome, which have a distinction from those coined for other places up to the end of the reign of Pius VI, 1799. Thereafter the types are uniform, and we place them here regardless of mint mark. The types may be briefly described as follows: Arms of the pontifical sovereign, surmounted by the crossed keys, above which is the tiara, or Pope's triple crown — Bust of St. Peter with keys, St. Paul with sword, or full length figures of same. We have quattrino and half baiocco pieces of the earlier popes from 35 to 75 cents.

TO THOSE WHO HANDLE MONEY, OR COLLECT COINS  
AND MEDALS AS A MATTER OF RECREATION,  
STUDY, OR PROFIT, THE FOLLOWING MAY  
BE FOUND INTERESTING.

---

**Numismatics.**—There are, upon a low estimate, ten thousand active collectors of Coins and Medals in the United States and Canada, whose cabinets represent, in intrinsic value, amounts from a few hundred dollars to many thousands. There are numerous collections which are valued above \$5,000 while some reach as high as \$25,000 and even \$50,000.

Our principal cities have Societies devoted exclusively to the science of numismatics, embracing hundreds of members, while many others upon history, antiquity, and kindred subjects, devote time and space to coins.

**Collecting as an amusement.**—In foreign countries the forming of cabinets of coins has been a means of pleasant recreation and study for upwards of four hundred years. This pursuit has not been confined to any class, rank or position. The field for collectors is large and varied, extending from the period when the first metal took the shape and name of a coin seven hundred and fifty years before Christ, in an almost unbroken line, down to the present time. Without the existence of these numismatic treasures, history would have many blank pages to-day. It cannot be said that coins are without interest, or that they possess less fascination, than other objects of curious research, whether antique, mediaeval or modern. They lead to such a knowledge of history and art, as cannot otherwise be obtained. There is no truer saying than that "we all have our hobbies." Hence we speak a word for Numismatics, commanding the same to your careful consideration, asserting that it will be found entertaining and instructive to a degree that challenges all other sciences or pursuits.

**How we promote it.**—We desire to announce to collectors and the public in general that we give our whole and undivided attention to the buying and selling of stamps, coins and medals, and of books treating on the subject. This is our only and exclusive business. We are not "spare time" dealers. Our stock at all times is large, embracing all classes of coins in the various periods, and our facilities for obtaining the same, at home and abroad, are unsurpassed. We have correspondents in the principal cities and coin centres of Europe and Asia, who, like ourselves, make a business of accumulating whatever is rare and interesting in the way of Coins and Medals relating to their special localities.

**Catalogues.**—Our Standard Catalogues, giving prices we ask for coins in several degrees of preservation, are widely and favorably known. They give in minute detail descriptions of various issues, embody many facts of historical interest, and are essential to the collector, who will find that they lessen his labors and enhance his pleasure.

**Our Circulars,** which are distributed free upon application, are applied for and sent to hundreds of collectors weekly. They are prepared with the view of making them instructive, attractive and serviceable, and they include a condensed price list of coins and medals covering all periods.

**Coins on Approval.**—While Price Lists and Descriptive Catalogues offer advantages to the collector in making purchases, we find that sending coins on approval gives the greatest amount of satisfaction. We are constantly supplying to our customers carefully prepared invoices of the special lines in which they are interested. By this method we have secured the patronage of numismatists from all parts of the world. We pay express charges one way, except when selections amount to less than \$5.00. Parties unknown to us must send references or a deposit.

**How to Send Orders.**—In sending orders, specify as nearly as possible the particular class of coins or medals desired, stating the country and period to be represented. It is also well to enumerate in your order a number of pieces that will in value exceed the amount of your remittance. It is impossible to keep a full line of everything, no dealer in the world can do this. Stock is constantly changing through the daily transactions in our business. Prices quoted in our catalogues do not include postage, and we register letters and packages only when supplied with an additional ten cents.

**Use Express Companies.**—The mails are regarded as unsafe for the transmitting of valuable packages. No claim for remuneration in case of loss is considered by the U. S. Government. Express Companies assume responsibility, hence we always urge the sending of important parcels by Express.

**No Counterfeits.**—We find the interests of the Science are best promoted and perpetuated by dealing *only in genuine coins*. We deprecate the manufacture, purchase, sale, or possession of electrotypers, copies, altered dates, or any false or fictitious piece whatsoever. Customers may rely upon receiving from us genuine coins, and in offering the same we always consider our reputation at stake.

**What Gives a Coin Value.**—The age of a coin is not conclusive to establish rarity; it is the historic interest it may possess, or the limited number struck, which will make it sought after by a large number of collectors. A coin of Augustus, the first Roman Emperor, B. C. 27 to A. D. 14, is obtainable in fair condition for 50 cents, while the 20 cent pieces from the U. S. Mint of 1877 and 1878 command from ten to fifteen times their face value. To go back a little further, a United States cent of almost any date between 1793 and 1814, in perfect state of preservation, is worth \$5.00, while some of the dates within this period are worth very much more—\$25.00 is not an uncommon price for the cents of 1793, 1799 and 1804.

CONDITION, or more plainly, the state of preservation, always regulates the price of a coin; it has the greatest bearing however on the rare issues which multiply rapidly in value as they approach perfection; this means mint state and positively unworn. If scratched, corroded, spotted, or stained; however slightly, its value is impaired.

**Auction sales.**—In this specialty we are prepared to assume every responsibility connected with the custody, cataloguing, and public sale of coins and medals. We are able to secure the patronage and competition of the buying collectors the world over. Our accurate attributions, clear descriptions, and impartial rating of condition, has brought the greatest satisfaction, to owner, cataloguer, and purchaser. By this means, we have obtained the highest prices for collections placed in our hands, and gained the confidence of bidders.

**We purchase.**—We are always prepared to buy rare, fine, or desirable pieces, but do not send them to us without first advising what you have, supply us with lists or rubbings; they may not be of sufficient value to repay cost of express; If they appear to have more than ordinary value, we will then inform you; but we never invest or make offers without seeing the pieces,—it is impracticable; hence, what you have to sell must be submitted for our inspection. Our "Premium List" contains all of the United States coins which are worth more than their face value.

**Central for business.**—Our Location is central, situated on one of the most noted and celebrated thoroughfares in the world, where those interested in the science are always welcome. Our extensive library and stock of Numismatic works is free for reference, while the inspection of our stock of coins and medals, separately enveloped and fully described with prices marked in plain figures, may be pursued *ad libitum*.

We cheerfully answer all questions relative to the subject of Numismatics whenever postage is supplied.

# The Coin Collectors Journal,

A PERFECT ENCYCLOPEDIA OF NUMISMATIC LEARNING.

THE SCOTT STAMP & COIN COMPANY, L'd, would call the attention of all coin Collectors to the merits of the above work, it being an indispensable companion of every well informed amateur. The special feature of each number is an accurate review of the coin sales of the month, with quotations of the prices realized for all the principal pieces. By this means collectors are kept posted as to the value of their coins and are thus enabled to buy or sell with profit. Readable articles on the coins of every nation, simplified by the aid of numerous illustrations, enable its readers to be well posted as to the nationality of all coins. We do not make it a practice (as has usually been the case), of illustrating only those rare and costly coins which are seldom found outside of museums or the collections of Princes, but aim rather to illustrate those puzzling pieces which find their way into every collection, and can rarely be located by their owners.

# THE MERCHANT FLAGS OF THE WORLD.

AUSTRIAN-ITALY.

BRAZIL.

FINLAND.

*Uncolored fac-similes, showing size and style.*

"These brilliant colored Flags faithfully represent the emblems of the different nations of the earth, and are such a great acquisition to any Album, while the exceedingly low price (25 cents) at which they are published places them within the reach of all."

"This Chart containing many Flags never before published, has been collected with great care, and can be relied upon as being strictly accurate, and by its aid the nationality of any ship may be easily determined, as it gives the Flag of the NATION instead of the gorgeous piece of bunting which simply belongs to one family, and is seldom, if ever, seen out of their country."

"These sheets possess three great advantages (to the Collector) over any other we are acquainted with, which consist in the facts that there is only one Flag to each country; more nations represented than have heretofore been given, and only Flags of those countries which issue postage stamps. These we consider of great importance to those who buy them to put in albums, as they can use them all instead of having to throw away half the purchase. The colors are very brilliant and within correct, and being printed on very thin paper, the book is not swelled to an inordinate thickness."

\* Beautifully and correctly printed in FIVE colors on thin paper for albums. Price only 25 cents.
